Dixon's Marine Group 2000 is a family owned and operated business with experience in the fishing industry since 1981. The Dixon Design was built and proven to participate in the winter commercial fishing industry in South West Nova Scotia, no matter what the weather.

Dixon's Marine provides customers with quality commercial and pleasure vessels. Our dedication to customer service and highest quality manufacturing by our team will ensure our customers receive continuing service for many years to come.

Dixon's offers packages starting with hulls through to a turnkey finished product. All products are hand laid, to your specifications and sizes. We offer

moulded components to fit both the Dixon 42' and the Dixon 45'. We are also pleased to announce our newest edition "The Offshore Dixon 50"

HAUL-UP SYSTEM

With our haul-up system we can move your vessel with ease into the yard or shop. The deep water, ice-free slipway means year round service is available for almost any size vessel

Haul-out / Storage Fees

- Haul-out on trailer \$250.00
- Haul-out on stands \$400.00
- Storage fees per month \$40.00

STORAGE

Dixon's Marine Group 2000 has a storage yard for commercial and pleasure craft vessels, available for storage or repairs.

Dixon's Marine custom builds all types and sizes of vessels, call today to discuss your project with us!

Dixon's 45' Semi-Planning

The Dixon 45' is available in a variety of widths and lengths to meet your specific application.

Starting at 16'8" we have widened up to a width of 22' and a draft of 5'.

Dixon 42' Semi Planning

The Dixon 42' is available in a beam of up to 16'2". The 42' has a draft of 4.5'. This model is available with a cape island style or a

straight sheer. This vessel is also equipped to handle all moulded components.

Offshore Dixon 50' (New in 2009)

Our newest edition to the Dixon line is here. It is a 50' x 20'+ version of our 45' x 16'8". This allows us to easily go to 25'+ in width. This design will be able to wear a variety of hats, meaning that it will be much roomier in the engine room, capable of a larger fish hole area, more depth, better fuel efficiency than the traditional full displacement styles...and much more. Fisherman need to go further and stay longer to make a living. This demands a safer more efficient vessel, which is the "Offshore Dixon 50"

A TRADITION OF QUALITY & EXPERIENCE
